Kebony H-clip fixing system

Product description

The Kebony H-clip fixing system is designed for hidden installation of Kebony Clear decking boards with side slits. The system gives a uniform 7 mm gap between boards and a 10 mm spacing between the boards and the substructure providing improved ventilation.

Advantages

- Hidden fastening solution
- Replacement of individual planks is possible
- Compatible with wooden and aluminum substructure
- Even plank spacing
- Weather-resistant

Item no	Description		Package content
2612	H-clips Plastic clip with stainless steel clamping plate. Note: Screws for either wooden or aluminum substructure must be purchased separately.		125 clips with clamping plate (covers app. 9 m ² with a joist span (c/c) of 50 cm).
